Full-Stack Web Developer with almost 1 year of hands-on experience building modern web applications using the Next.js and Mernstack. Skilled in creating dynamic, responsive, and secure applications with strong attention to performance and user experience. Proficient in both front-end and some knowledge of back-end technologies, RESTful APIs, and database management. Passionate about crafting intuitive user interfaces and scalable backend systems.

EDUCATION

The Islamia University of Bahawalpur

Feb 2023 - Jan 2027

Bachelor of Software Engineering - CGPA 3.20

EXPERIENCE

FullStack Developer

FutureDevSolution (june 2025 - Present)

- Collaborated on A Role-Based Networking Platform connecting entrepreneurs and investors
- Utilized NEXT.js ,React.js, Vite, Tailwind CSS, React Router and Context API for front-end development
- Developed dynamic role-based dashboards, user profiles, and a collaboration request system.
- Followed modern coding standards, Git version control, and agile practices in a remote team setting
- Integrated backend APIs and handled database operations for storing and retrieving user data
- Debugged issues and optimized performance to improve application speed and reliability

TECHNICAL SKILLS

- **Languages:** JavaScript ,TypeScript
- **FrontEnd:** ReactJs, NextJs ,TailwindCss
- **BackEnd:** NodeJs, ExpressJs, MongoDB, PostgreSQL
- **Others:** JWT ,NextAuth, responsive Design

PROJECTS

Pizza Ordering web Application

Technologies: NextJs,Node.js,MongoDb, Tailwind CSS

Project Details.

- Developed a full-stack pizza ordering platform with dynamic product listing,search functionality and cart management
- Implement global state management using React Context API for handling cart and user action
- Built RESTful API to manage products,orders and user data with efficient database queries

key Features

- Authentication & User System
- Cart & Order Management
- Search & Filtering
- analytics &Staff management
- Backend & Database Design
- Responsive &UI/UX

Hotel Management System

Technologies: NextJs, Node.js, JWT ,MongoDb

Project Details

- Build a web-based system to manage hotel operations including room booking, customer management and billing
- Implement real-time room availability and reservation system with data-based booking logic
- Designed a role-based authentication system for admin and users

key Features

- Booking & Reservation
- Room Management
- User Management
- Role Based Authentication
- Admin Dashboard.
- Search & Filter
- Reports
